## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17 and 43-46, drawn to a power supply system, classified in class 363, subclass 13.
  - II. Claims 18-29, drawn to a fuel pack, classified in class 422, subclass 129.
  - III. Claims 30-42, drawn to a power generator, which supplies electric power to a load, classified in class 701, subclass 115.
  - IV. Claims 47-51, drawn to a power generator, which generates power by using a fuel, classified in class 123, subclass 495.
2. Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The inventions are distinct, each from the other because of the following reasons:
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Leonard Holtz on August 6, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1745

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
